

## Nature Scavenger Hunt

Go for a walk or wander around the park or your garden and find as many of these things as you can!

Try not to disturb any creatures or their habitats, and only pick up things that there are plenty of, and that will not hurt you.

Happy searching!

A lichen covered stick	Something that smells nice	Something spikey	Something purple
Something furry	A butterfly or moth	A pinecone	A spider's web
A creature's home	Something smooth	A feather	A giant leaf
A tiny leaf	A worm	Tracks of a creature	A ladybird

## Making Musical Instruments

How to make a shaker:

- Find a strong, medium sized, Y shaped stick
- Tie smooth string or wire on one side of the Y at the top
- Thread about 5 or 6 buttons through the string/wire
- Tie the string/wire on the other side of the Y at the top so it is taught
- Shake!

How to make a rain stick:

- Find an empty plastic bottle with a lid
- Search for small sticks that will fit inside the bottle
- Fill the bottle with small sticks, shaking it occasionally, until you can't fit any more in
- Pour in some dry rice, seeds or dry pulses (use a funnel if you have one) but leave enough room for the rice to move between the sticks
- Put the lid on the bottle and slowly turn the bottle around and upside down to hear your rain stick!

## Create a Nature Alphabet!

Find as many things in nature as you can that look like letters of the alphabet!

If you like, take a photo of them as you go along and collect all of the letters of the alphabet!

This might take a long time, so why not look out for a new letter of the alphabet each time you go outside, or when you go for a walk!

Here's some ideas:
